August 2014

Dear

My message about "Time for nesting" in last month's newsletter certainly struck one of our Bryanston customers. He replied with the request that we please come to his house, take down all his nesting boxes, survey his forest of indigenous trees and supply and install our recommended mixture of nesting boxes in his garden. I asked Elaine to help me and she, Steward and I paid a visit to Bryanston to see what his request entailed. A very interesting morning followed. We were shown the garden, introduced to the gardener and then left to do our work.

The result was a recommendation to install a total of 15 nesting boxes made up of sisal logs on some of the tall trees, some sparrow nesting houses, three barrel nest houses for barbets, sparrows or starlings and a spotted eagle owl box for the eagle owl that has nested there before. See the pretty Nesting Houses and Boxes now in stock at all stores at the end of this newsletter.
